C Your career index

Based on: Data, AI and machine learning, Design, Marketing

Three paths that could fit you

Your intake form was blank, so these cover the form's main themes. Salaries are rough entry-to-mid ranges in India, in lakh per year (LPA).

The index

Look up a path, then jump to its page.

Data analyst & machine learning ..... 4–15 LPA
numbers, patterns, predictive models

UX & product designer ..... 4–14 LPA
screens people enjoy using

Content & digital marketer ..... 3–10 LPA
stories that find an audience

Learning paths, beginner to advanced ..... 18 courses
courses, cost, duration, level

Data analyst & machine learning

Turns raw data into decisions, then teaches models to predict what comes next

Why this fits you

You like logic and maths, and this path pays you to find the answer hiding in the numbers and then build models that predict it.

Skills you'll need

Excel | SQL | Python | Statistics | Machine learning | scikit-learn

Data visualisation | Problem solving

Courses to choose

Google Data Analytics Certificate Paid, Coursera
Covers spreadsheets, SQL, Tableau and a portfolio project. Start here.

Kaggle Learn: Python, Pandas, SQL, Intro to ML Free
Short hands-on lessons you can finish in a weekend each.

Machine Learning Specialization, Andrew Ng Paid, Coursera
The standard first ML course: regression, neural networks, model tuning.

Highest-package route
Learn SQL and Python first, then the ML Specialization, then publish 3 projects on GitHub or Kaggle. Data scientist and ML engineer roles pay the most in this path.

₹4–15 LPA analyst roles at the low end, ML skills push you toward the top

Back to index

UX & product designer

Shapes how apps and websites feel

Why this fits you
You'd get creative freedom while still solving real problems for real users.

Skills you'll need

Figma | User research | Wireframing | Visual design | Communication | Teamwork

Courses to choose

Google UX Design Certificate Paid, Coursera
Takes you from research to wireframes to a finished prototype.

Figma Learn and Figma tutorials Free
Figma is the main tool employers expect, so practise in it daily.

Interaction Design Foundation courses Paid membership
Go deeper on UX research, usability testing and design thinking.

Highest-package route
Build 3 detailed case studies (problem, research, solution, result) in a portfolio site, then aim for product companies. Product designers and UX researchers there earn the most.

₹4–14 LPA a strong portfolio matters more than a degree

Back to index

Content & digital marketer

Grows brands with words, video and data

Why this fits you
It rewards writing and communication, and it's quick to learn and easy to do remotely.

Skills you'll need

Writing | SEO | Social media | Analytics | Public speaking | Creative thinking

Courses to choose

Google Digital Marketing & E-commerce Certificate Paid, Coursera
Covers SEO, paid ads, email and social media in one track.

HubSpot Academy: Content Marketing and SEO Free
Good for writing, blogging and building a content strategy.

Google Analytics certification, Skillshop Free

Proves you can measure results, which employers pay extra for.

Highest-package route

Don't stay a general content writer. Specialise in performance marketing (paid ads) or SEO plus analytics, because roles tied to revenue pay more.

₹3–10 LPA rises quickly with results and specialisation

Google, on Coursera
Beginner ~6 months at 10 hrs/week Subscription
See course details

4 **Machine Learning Specialization**
Andrew Ng, DeepLearning.AI on Coursera
Intermediate ~2 months at 10 hrs/week Subscription

See course details

5 **Deep Learning Specialization**

DeepLearning.AI on Coursera

Advanced ~3 months at 10 hrs/week Subscription

See course details

6 **Machine Learning Engineering for Production (MLOps) Specialization**

DeepLearning.AI on Coursera

Advanced ~4 months at 5 hrs/week Subscription

See course details

Back to index

Durations are the providers' own estimates and vary with your pace. Costs: "Subscription" and "Membership" are paid, so check the current price on the platform.

Ranges are approximate and vary by city, company and experience. A certificate alone doesn't set your package: projects and a portfolio do. Course names, prices and availability change, so check each platform before enrolling. Fill in the form's answers and I'll tailor this index to you.
